DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-27,35,37 and 38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following limitations -- x-slide, z-slide, x-guide, and z-guide – are present in many of the claims. There is insufficient antecedent basis for these limitations in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3722

Claims 1,2,3,28 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kojima Hiroshi et al. in view of Hirose et al.

Kojima Hiroshi et al. discloses a machine frame (2), a first spindle housing (5), a second spindle housing (6), a first working spindle (5b), a second working spindle (6b), a first tool carrier (7), a second tool carrier (9) where the first and second tool carriers are disposed on the same side of the carrier. Kojima Hiroshi et al. lacks the disclosure of third tool carrier movable in at least the x direction. Hirose discloses a tool carrier (6) movable in at least the x direction. It would have been obvious to a skilled artisan to provide Kojima Hiroshi et al. with a third tool carrier movable in at least the x direction in the manner as taught by Hirose et al. in order to increase the versatility of the machine.

Allowable Subject Matter

Claims 29-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8-27,35,37 and 38 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
